Summary for polisciprep

Looking back on how your major prepared you for the job market, which of the following activities would you suggest students do to better prepare themselves?

Answer	Count	Percentage
Take more scientific-quantitative courses (e.g. statistics, applied math) (1)	3	0.59%
Do extra-curricular activities (2)	10	1.98%
Do independent studies with professors (3)	3	0.59%
Other	4	0.79%
Not completed or Not displayed	493	97.62%

ID	Response
819	Political Science is broad field, I would recommend trying to really think about what you want to do with it. There are so many option and I didn't really think about it until I was about graduate
1046	Avoid having to work full-time during school to ensure you can eat and pay rent. Western & Bellingham do not have sufficient resources (socioeconomic or political) to help house and feed the expanding student population. More so, the neoliberal approach to spending that the university takes is rotting it from the inside out.
1104	Network & socialize with people in a similar field
1192	Talk to professors/the career center about getting relevant experience. If you're nervous about doing that, instead cold-email a bunch of places you're interested in even if they don't have listed positions. Doing that can net you well-paid part-time gigs in the subject area you study! I worked through college so it was an advantage for me that I had several years of work experience already in the field I was job searching in after graduation.

Summary for poliscireprepopen

Looking back on how your major prepared you for the job market, what skills did you acquire that have been the most useful in your current employment

Answer	Count	Percentage
Answer	9	1.78%
No answer	3	0.59%
Not completed or Not displayed	493	97.62%

ID	Response
763	Being able to communicate clearly points briefly but also being able to relay information in long form. I think the other key was teaching me how to manage my time and to work smart, to determine what is important and what isn't.
819	The skills that helped me the most is writing and oral communication skills. Being able to effective communicate why I'm the person they should hire. Has helped me in interviews and writing cover letters.
1046	N/A. Western's education (much like most US colleges) throughout the years of COVID did not take into account the idea that the economy would ultimately fail a large portion of the upcoming graduates.
1104	Writing, talking, and knowledge of the field
1105	Collaboration with others and being able to quickly get familiar with new systems of an organization's practices and policies
1143	none, my major classes did not help with my current position and at most demonized my current position
1146	I'm unemployed
1172	Most jobs seems to look for things that can't be taught just in terms or overall demeanor and disposition. Most other non technical things can be taught. I find that I likely could have just have readily done my job prior to getting a college education, but the fact I have done so allows me to get the job.
1192	I do a lot of writing at my job. The poli sci and LDJ professors at WWU assign a ton of reading along a broad variety of legal/political subjects. Frequently reading and grappling with complex ideas in this subject area makes it a lot easier to write about it in a professional capacity.
